

# STRAP MIRROR

DESIGN BY HAY

# HAY

1.

As Strap/50 and 70 are heavy mirrors, we advise you to secure them with an extra screw in the wall mount on the back of the mirror. After the wall mounts have been attached, place the mirror on the screw, before finally placing the silicone strap around the mirror and the wall mount.

The screws and wall plugs enclosed are suitable for a brick wall. If you are mounting the mirror on a different material you should buy suitable screws and wall plugs.

NOTICE

Strap Mirror is not approved for bathroom use as the steel frame might rust.

Our Care & Maintenance offers guidance for optimal maintenance of your HAY product. It includes advice and instructions on cleaning and caring for specific materials to prolong the life of your furniture.
